## **Acasti Receives NASDAQ Notification Regarding Minimum Bid Requirements**

LAVAL, Quebec, Nov. 11, 2014 (GLOBE NEWSWIRE) -- Acasti Pharma Inc. (" **Acasti**" or the "**Corporation**") (Nasdaq:ACST) (TSX-V:APO), an emerging biopharmaceutical company focused on the research, development and commercialization of new krill oil-based forms of omega-3 phospholipid therapies for the treatment and prevention of certain cardiometabolic disorders, announces that on November 7, 2014 it received notification from the NASDAQ Listing Qualifications Department for failing to maintain a minimum bid price of US\$1.00 per share for the last 30 consecutive business days, as required by NASDAQ Listing Rule 5550(a)(2) – bid price.

The NASDAQ notification has no immediate effect on the listing of the Corporation's shares. Under NASDAQ rule 5810(c)(3)(A) – compliance period, the Corporation has 180 calendar days, or until May 6, 2015, to regain compliance. If at any time over this period the bid price of Acasti's shares closes at US\$1.00 per share or more for a minimum of ten (10) consecutive business days, NASDAQ will provide written confirmation of compliance and the matter will be closed.

If Acasti does not regain compliance within the initial 180-day period, but meets the continued listing requirements for market value of publicly held shares and all other initial listing standards for the NASDAQ Capital Market (rule 5505 – Capital Market criteria), except for the bid price requirement, the Corporation may be eligible for an additional 180 calendar days to regain compliance. If the Corporation is not granted additional time, then the securities will be subject to delisting, at which time the Corporation may appeal the delisting determination to a NASDAQ Hearings Panel.

The Company intends to evaluate all available options to resolve the deficiency and regain compliance with the Minimum Bid Price Rule.

### **About Acasti Pharma Inc.**

Acasti is an emerging biopharmaceutical company focused on the research, development and commercialization of new krill oil-based forms of omega-3 phospholipid therapies for the treatment and prevention of certain cardiometabolic disorders, in particular abnormalities in blood lipids, also known as dyslipidemia. Because krill feeds on phytoplankton (diatoms and dinoflagellates), it is a major source of phospholipids and polyunsaturated fatty acids ("PUFAs"), mainly eicosapentaenoic acid ("EPA") and docosahexaenoic acid ("DHA"), which are two types of omega-3 fatty acids well known to be beneficial for human health. CaPre<sup>®</sup>, currently Acasti's only prescription drug candidate, is a highly purified omega-3 phospholipid concentrate derived from krill oil and is being developed to help prevent and treat hypertriglyceridemia, which is a condition characterized by abnormally high levels of triglycerides in the bloodstream. ONEMIA<sup>®</sup>, a medical food and currently Acasti's only commercialized product, is a purified omega-3 phospholipid concentrate derived from krill oil with lower levels of phospholipids, EPA and DHA content than CaPre<sup>®</sup>.
